Summary

Computer Science undergraduate specializing in AI and full-stack development, with hands-on experience building production-grade AI-powered web applications leveraging LLMs, NLP, and Retrieval-Augmented Generation (RAG) techniques. Proficient in Python, React.js, and FastAPI, with a strong foundation in Data Structures & Algorithms (500+ LeetCode problems, rating 1764). Seeking an internship or entry-level role to contribute to impactful software engineering and Agentic AI projects.

Education

Parul Institute of Engineering and Technology

Bachelor of Technology in Computer Science and Engineering | CGPA: 7.7

Aug 2023 – May 2027

Vadodara, Gujarat

Projects

CampusConnect – AI-Powered Placement Portal | *React.js, FastAPI, PostgreSQL, Python, Scikit-learn* [GitHub](#)

- Engineered a full-stack AI-powered placement portal connecting 2+ user roles (students, recruiters), automating resume parsing and candidate-job matching end-to-end, reducing manual shortlisting time by **40%**.
- Built NLP-based resume parser using SpaCy and pdfplumber, extracting and structuring candidate skills from PDFs with **90%+ parsing accuracy**.
- Created an intelligent scoring mechanism to rank candidates against job postings, improving shortlisting efficiency and reducing manual review effort by **35%**.
- Architected role-based dashboards (Student, Recruiter, Admin) with real-time application tracking and personalized job recommendations.
- Exposed **10+ REST API endpoints** using FastAPI covering job postings, applications, user management, and AI-driven recommendations.

Smart AI Tutor & Quiz Generator | *React.js, Tailwind CSS, FastAPI, SQLite, Groq API*

[GitHub](#)

- Engineered a full-stack AI-powered learning platform enabling users to master topics through dynamically generated, LLM-driven quizzes.
- Integrated Groq LLM API with a **retrieval-augmented generation (RAG)-style context injection** pipeline to generate real-time, topic-grounded explanations and adaptive quiz questions, reducing content creation time by **80%**.
- Applied a structured 3-stage learning workflow (Learn → Quiz → Evaluate) with automated scoring and answer validation logic.
- Constructed RESTful APIs for seamless frontend-backend communication, supporting **50+ concurrent user sessions** efficiently.
- Crafted a fully responsive user interface using Tailwind CSS, achieving smooth cross-device interaction.

Technical Skills

Programming Languages: C++, C, Java, Python

Web Technologies: React.js, Node.js, Express.js, HTML, CSS, JavaScript, Tailwind CSS

Frameworks & Libraries: FastAPI, SpaCy, Scikit-learn, pdfplumber

AI / Generative AI: LLM Integration, RAG (Retrieval-Augmented Generation), Prompt Engineering, Agentic AI Concepts, NLP

Databases: PostgreSQL, SQLite, MongoDB

Tools & Platforms: Git, GitHub, VS Code, Postman, Overleaf

Core CS Concepts: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Computer Networks

Achievements

- Solved **500+ Data Structures and Algorithms** problems on LeetCode using C++, covering arrays, trees, graphs, and dynamic programming.
- Attained a **LeetCode rating of 1764** ([Profile](#)), placing in the top competitive tier on the platform.
- Attained a **CodeChef rating of 1186** and secured **Global Rank 1524** in Starters 187 (Rated contest) out of thousands of participants.
